Unit 1 · Session 1 · SLO 2 — Solved Worksheet

Name: R L KRISHE YADAV R L KRISHE YADAV | **Reg. No:** RA2511030010473

Unit â€“ 1 : Session â€“ 1 : SLO â€“ 2 | Functional Units of a Computer â€” Clues

I. Answers

1. CONTROL UNIT â€” directs the operation of the processor by telling other parts of the computer how to
• respond to instructions.

2. OUTPUT UNIT â€” conveys information from the computer to the user or external device in usable form.

3. MAIN MEMORY (RAM) â€” temporarily stores data and instructions the CPU needs while executing programs.

4. INPUT UNIT â€” receives data from the user or environment and converts it into computer-readable form.

7. MEMORY (STORAGE UNIT) â€” holds data, instructions and results either temporarily or permanently.

11. SECONDARY STORAGE â€” non-volatile memory storing data and programs permanently (hard drives, SSDs).

19. CPU (Central Processing Unit) â€” the brain of the computer; processes instructions and manages all
• other units.

20. ALU (Arithmetic and Logic Unit) â€” part of the CPU performing mathematical and logical operations.
