Unit 1 · Session 9 · SLO 1 — Solved Worksheet

Name: R L KRISHE YADAV R L KRISHE YADAV | **Reg. No:** RA2511030010473

Unit â€“ 1 : Session â€“ 9 : SLO â€“ 1 | Open Source Operating Systems â€” Rebuild the Message

I. Rebuilt Message

• Choosing the letters for each cell rebuilds the sentence:
• "LINUX IS A FREE AND OPEN SOURCE OPERATING SYSTEM."

II. Open Source Operating Systems â€” Definition and Examples

• Open source OS: operating system whose source code is freely available to study, modify and
• redistribute under an open license (GPL, BSD, Apache).
• Examples: LINUX (Ubuntu, Fedora, Debian), FreeBSD, OpenBSD, Android (AOSP), ReactOS, MINIX.
• Advantages: transparency, community support, no licence cost, customizability, security auditing.
